

Salford Green Party

Sustainable Farming
Your candidate Wendy Olsen recommends...

Green Party favours healthy living for all.

Minimum wage for all workers in restaurants, free tap water on tables,

A ban on the production & sale of genetically modified foods, and: until then, clear labeling of GM foods.

LIE: long-distance trade is efficient.

LIE: packaged food is better.

THE TRUTH: using petrol to move food around is wasteful. Fresh raw local foods are better for you.

Salford Greens Favour Sustainable Farming

We protect the soil.
The nutrients are respected.
The good farming practices reduce climate-change emissions.

Email your candidate:
wendyolseninsalford@gmail.com

The Green Party will use subsidies, financial incentives, regulation, education, research and participation to support a transition towards more sustainable farming systems

We welcome your suggestions on how Salford Council can help promote healthy living, gardening, organic food, local purchasing and encouraging small business.

Sustainable Farming

Messages from Salford Green Party

The Salford Green Party favours healthy living for all.

The Greens will minimise transportation of food and other agricultural products by supporting local food distribution. We can use local products from Clitheroe, Bolton, Preston and the farms up near Southport. Reduce the global warming whilst eating a healthy diet.

Green policies reduce the middlemen's charges on our food. Example Shown (photo).

Prawns: Grown far away. These are not economical to transport in a frozen state to the UK. Try buying locally.

Organic foods have less chemicals.

In global food markets, poor countries are at a disadvan-

Wendy Olsen is your local candidate for Councillor.

to raise issues.

Ban the import of crops linked to habitat destruction such as soya beans from cleared rainforest land.

Support habitats throughout Salford.

Keep and grow woods, orchards, hedges. Use schools to promote gardening and good food practices.

Responding to your requests, issues, complaints.
